Eliminating the need for Port Forwarding

Are you tired of the hassles involved with programming port forwarding on customer's routers? Frustrated with figuring out how to navigate through the various brands of routers and having to open up a string of ports and trying to penetrate firewalls just to establish a remote connection?

Well, we have a solution to that very problem and it's called P2P (Peer-to-Peer) feature built-in with each WatchNET recorder. The benefit of P2P is that it eliminates the need to perform port forwarding. P2P will save you from major headaches, time and money.

It works in conjunction with our MVS Pro or MVS Lite mobile apps designed for both Android and iOS devices. For desktops and laptops, we offer our VMS Pro or VMS Lite Windows-based application.

Setting up P2P is a snap as you simply scan our recorders QR code by use of our MVS app or by noting the serial number of the recorder for the VMS app.

For detailed instructions on setting up P2P, please visit our video tutorials at the links shown to the left column of this newsletter.

New Product Announcement

WatchNET is proud to announce two new MPIX series of IP cameras to our already expansive line-up. Availability and release date: March 2016.

MPIX-21MP4X

- IP66

Staff News

We are pleased to introduce our newest family member, Chris Chan as our new Product Manager. Chris brings 20 years of security industry experience having previous roles as a Product Manager and Systems Engineer with major manufacturers and integrators.

He has been involved with the design and implementation of large CCTV systems with casinos, public transportation, correctional institutions, hospitals, government facilities, franchise retailers and large financial institutions.

His experiences will help better serve our customers and dealers in pre-sales support of large scale IP-based projects and in communicating new product releases along with other marketing efforts.

Corporate Profile**Corporate HQ**

WatchNET is a Canadian-based manufacturer and global leader in the security industry since year 2000.

We manufacture analog, XVi/CVi, IP-based video surveillance cameras and recorders, plus door access control systems. In addition, we provide centralized video management and recording solutions for large-scale requirements.

WatchNET has offices and representatives world-wide including Canada, USA, Dubai, India and Hong Kong.
