Which NVRs are compatible to 6MP cameras?

Many often raise the question on which model of WatchNET NVRs can support 6MP or greater resolution for recording if at all possible? The answer is YES we have a few recorders that will do the trick as follows:

Enterprise Class NVRs:

- a. EN-644K: supports up to 12MP recording resolution
- b. ENX-128HD: supports up to 12MP recording resolution

Redundant series of NVRs:

- a. IPVR series: supports up to 12MP recording resolution

EN-644K

ENX-128HD

IPVR series

Staff News

We are pleased to introduce our newest family member, Omar Stephenson as our new Technical Support Manager. Omar brings 16 years of security industry experience and was previously employed with us for 6 years.

His past and present experiences will help better serve our customers and dealers in post-sales support of CCTV and access control systems.

Let's give Omar a warm welcome!

Tech Corner

Did you know with our access control system, you can prevent any administrative changes to the control panel such as network configurations and password settings all through a flip of a dip switch? Well, you certainly can and it's just one of the many reasons to buy WatchNET.

Corporate Profile

Corporate HQ

WatchNET is a Canadian-based manufacturer and global leader in the security industry since year 2000.

We manufacture analog, XVi/CVi, IP-based video surveillance cameras and recorders, plus door access control systems. In addition, we provide centralized video management and recording solutions for large-scale requirements.

WatchNET has offices and representatives world-wide including Canada, USA, Dubai, India and Hong Kong.
