

SIP Base Audio Box

AVCNAB Quick Guide

(1) Introduction

WatchNET's SIP based Audio Box provides a dedicated high performance digital amplifier, best suited to broadcast announcements or play background music. Built-in 3.5 Watt amplifier can drive indoor / outdoor speakers for paging and can work as a centralized music distribution system to play background music and advertisements. Easy web based interface to configure the unit with any SIP based telephone system.

(2) Wiring

(3) Power

The Video Door Station supports POE (Power over Ethernet) 5V DC

(4) Powering up SIP Base Audio Box

- The Default IP of the audio box is: **"192.168.119.110"**
- To configure the audio box you can use any web browser and just type in the default IP on the address bar
- Then configure the network base on the router and then SIP account, the default Username and Password is "admin" & Password: "admin"

(5) Troubleshooting

If the SIP Base Audio Box does not turn on or does not work properly please refer on below solutions

Possible causes	Solutions
Audio Box does not turn on	Please make sure to check the DC power or the network cable if using POE
The speaker does not work	Make sure to use a proper speaker for the Audio box
I cannot login via web	Please assign a same IP range on the computer first before logging in via web
